PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience in Django, React.js, REST APIs, HTML, CSS, JavaScript, MySQL, and SQLite. Completed a Python Full Stack internship with Generative AI exposure, building responsive web applications, integrating APIs, and designing databases. Proficient in Git, GitHub, and MVC/MVT architecture, with a strong foundation in full-stack development.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Backend & APIs: Django, REST API design, JSON, MVC/MVT architecture

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap, Responsive Web Design

Databases: MySQL, SQLite, Database Design

Tools & Version Control: Git, GitHub, Visual Studio Code, Swagger

WORK EXPERIENCE

Python Full Stack with Generative AI Intern, Dhee Coding Lab

Feb 2026 – May 2026

- Completed an internship in full-stack web development combined with Generative AI tools and workflows.
- Built web applications and AI-based features using Python, Django, and modern frontend technologies.
- Integrated REST APIs, managed version control with Git, and developed responsive user interfaces.
- Worked within a team on assigned project tasks, following structured development and review cycles.

PROJECTS

Student Database Management System

Developed a full-stack Student Database Management System using Python, Django, HTML5, CSS3, JavaScript, and SQLite to efficiently manage student records. Implemented complete CRUD operations with secure server-side form validation, SQLite database integration, and REST-style URL routing for seamless data management. Designed a responsive and user-friendly interface following the Django MVT architecture, optimized database queries for improved performance, and utilized Git for version control and collaborative development.

Domain Expert Discovery Platform

Developed a web-based Domain Expert Discovery Platform using Python, HTML5, CSS3, JavaScript, and MongoDB to automate expert identification and data aggregation. Designed REST-based data workflows and scalable data-processing pipelines to improve expert matching accuracy and system efficiency. Integrated MongoDB for efficient storage and retrieval of expert profiles, optimized backend processing for faster response times, and built a responsive user interface to deliver an intuitive and seamless user experience.

EDUCATION

Bachelor of Engineering, Information Science and Engineering

CGPA: 8.0 | 2026

City Engineering College

CERTIFICATIONS

- Internship on Full Stack with Generative AI — Dhee Coding Lab
- Internship on MERN Stack — Edunet Foundation

PROFESSIONAL SKILLS

Strong team collaboration, communication, and problem-solving skills developed through academic projects and internship experience. Adaptable to new tools and technologies with a continuous learning mindset. Capable of managing tasks effectively, taking ownership of responsibilities, and meeting project deadlines.
